SKILLS

Technical Skills: React, NextJS, Typescript, Tailwind, SASS, HTML, CSS, JavaScript, ShadCN

RELEVANT PROJECTS

Real Outfit | E-commerce Web Application   Live Demo | Repo

- Designed and delivered intuitive, responsive UIs for mobile and desktop, improving user experience.
- Developed full-stack e-commerce functionality, including product browsing, secure authentication, and a shopping cart, reducing friction in the user journey.
- Implemented NextAuth-based authentication and session management, and integrated PostgreSQL with Prisma ORM for efficient management of products, users, and orders to guarantee data integrity.
- Built robust form validation and input handling using React Hook Form and Zod, minimizing user errors.
- Engineered front-end and back-end solutions with Next.js API routes, improving scalability.
- Released key features like checkout flow, user profiles, and an admin dashboard, driving progress toward a fully functional MVP, currently in progress.

Up Immigration | Immigration Consulting Website   Live Demo | Repo

- Built modular, accessible UI components using ShadCN and Tailwind CSS, improving design consistency.
- Ensured mobile responsiveness, aiming for good performance across various screen sizes.
- Implemented multilingual support with Next-Intl, enabling accessibility for international audiences.
- Collaborated on content structure and front-end logic, significantly enhancing overall user experience.
- Delivered clean, maintainable code aligned with best practices to ensure scalability and long-term maintainability.
- Actively participated in client alignment meetings to clarify requirements and manage expectations, ensuring timely delivery and satisfaction.

Finance M8 | Money Manager App   Live Demo | Repo

- Developed a money management app to help users track income and expenses, improving financial visibility and control.
- Designed intuitive, responsive user interfaces, ensuring a seamless experience across devices.
- Built and maintained full-stack architecture, handling both front-end and back-end development for optimal performance and reliability.
